

POST-COVID TREND

MSMEs in construction, food sectors fuel credit rise

MIHIR MISHRA
New Delhi, August 16

AMONG MICRO, SMALL and medium enterprises (MSMEs), those involved in food products and construction materials, as well as the ones involved in investments in technology are driving the post-Covid credit growth in the sector. Companies that lend to MSMEs say e-commerce was strong even during the pandemic, and retail and food services picked up about a year back.

"Companies that have seen an increase in borrowing in terms of percentage of total disbursement include food products, which has seen an uptick in borrowing from around 14% in FY19 and FY20 to nearly 20 per cent in FY21 and FY22. During the same period, the construction materials industry has shown increased credit demand, going from around 4% of the pie to over 7%," said Hardika Shah, founder & CEO, Kinara Capital, in an email reply.

LENDING TO E-COMMERCE STRONG

■ Companies that lend to MSMEs say e-commerce was strong even during Covid, and retail and food services picked up about a year back

■ The MSME sector was one of the worst hit during the pandemic and the resultant lockdowns

The MSME sector was one of the worst hit during the pandemic and the resultant lockdowns led to loss of business. "We have seen a strong pickup in demand for credit over the past 12 months across these categories. In terms of gradation, while e-commerce continued to be strong through the course of pandemic, retail and food services sectors picked up about 12 months back, and travel has seen a strong revival over the

past 6-9 months," Alok Mittal, MD of Indifi Technologies, said in an email response. The State Bank of India's (SBI) Ecowrap report released in July also echoed the aforementioned trend and said that incremental credit to the MSME sector has been on an upswing. "Around 74% of such is purely because of the credit guarantee scheme, and the remaining 26% is because of other schemes including the

definitional change in the MSME sector. In terms of overall credit growth, the ECLG scheme has contributed 15% of the expansion," read the report. The Emergency Credit Line Guarantee Scheme (ECLGS) was unveiled as part of the comprehensive package announced by the government in March 2020 to aid the MSME sector in view of the economic distress caused by the Covid-19 pandemic. According to the Ecowrap report, around ₹2.36 trillion has been disbursed to MSMEs under the ECLGS. However, it is not just Covid; the sector is also suffering from delayed payments. Data from Bengaluru-based non-profit mass entrepreneurship facilitator Global Alliance for Mass Entrepreneurship (GAME), data analytics company Dun & Bradstreet, and Omidyar Network show that delayed payments to the MSME sector have increased to ₹10.7 trillion till the end of 2021 calendar year.

Panel wants strict beneficiation norms for miners

SURYA SARATHI RAY
New Delhi, August 16

AN IRON ORE miner will have to upgrade through beneficiation 80% of the low-grade ore produced in a mine annually or face penalty including termination of the lease, if the mines ministry accepts recommendations of an inter-departmental committee. If the recommendation is finally endorsed by the government, it will impact both merchant and captive miners, including Rungta Mines, Vedanta, Serajuddin & company, JSPL, JSW Steel, as they will have to either put up new beneficiation units or expand

capacity of the existing units, according to industry sources. While putting up capital-intensive infrastructure is itself an onerous task, the miners will also have to acquire land for putting up the unit which is again a big task. The government had constituted the panel to suggest ways to ensure better utilisation of low and lean grade iron ore resources in the country. Typically, about 20% of the produce during mining turns out to be low-grade iron ore, having less than 58% iron content; the rest contains 62% or more. India produced 253 million tonnes (MT) iron ore last fiscal. The domestic steel industry

does not use low-grade ore for lack of available technology. It uses higher-grade (62% Fe or above) in the blast furnace or pellets produced through beneficiation of low-grade ore in the iron-making. The remaining low-grade ore is generally exported. As per the committee's recommendations, which the mines ministry has put up in its website for consultation with industry, 80% of the ore having less than 58% Fe content produced annually in a mine will have to be beneficiated for 62% or more iron content. "In case of shortfall in beneficiating the 80% of low-grade iron ore of below 58% Fe, which

shall be assessed on a quarterly basis, the lessee shall pay to the state government, an amount of royalty and premium as applicable to the iron ore lumps or fines of 62-65% grade, as the case may be, on the difference between the minimum quantity of mineral to be beneficiated in the said quarter and the quantity actually beneficiated," the committee recommended. On top of it, the committed suggested that the state government may terminate such lease where the lessee does not maintain the minimum quantity of ore to be beneficiated for two successive years and fails to pay the amount payable on such shortfall after two years.

IIT-D LAUNCHES LAB FOR OFFERING CIVIC SOLUTIONS
THE INDIAN INSTITUTE OF Technology-Delhi's Foundation for Innovation and Technology (FITT) on Tuesday launched its Public Systems Lab (PSL) to develop scalable solutions for

civic systems and services that impact millions, in collaboration with the United Nations World Food Programme (UNWFP). The PSL will help public systems enhance performance and thereby ensure fundamental levels of well-being. —ANVITII RAI
